**WOULD YOU CHOOSE TO
DO SOMETHING
GOOD FOR YOUR BODY?**

THE FUTURE OF HEALTH

EVERYTHING YOUR BODY
NEEDS IN JUST SECONDS...

OUR STORY

As the world continuously evolves, we have begun seeing a shift in health and wellness.

Worldwide, people have become busier daily and often lack essential nutrients needed for their bodies to thrive.

Our bodies must consume the right amount of nutrients daily to maintain a healthy immune system and reach peak performance.

This is why NVISIONU has created health and wellness products with your needs in mind. We have discovered how to impact the spirit, body, and soul with spray technology in 30 seconds.

Our vision is for you to be healthy and wealthy from the inside out. With NVISIONU, you can achieve optimal health and start living the life you always dreamed of.

AND GUESS WHAT? WE DIDN'T PUT THIS VITAMIN IN A PILL...

Because, pills are riddled with toxins, and unwanted "fillers." And many of us only absorb about 10% of these vitamins in pill form. Some of us even get these pills stuck in our stomach. Not to mention, we ingest all the unwanted sugar, yeast, wax and shellac from the casing of these pills...

To avoid this, we worked with the world-renowned doctors, nutritionists and scientists to create the first ever spray supplements.

HOW IT WORKS? OUR TECHNOLOGY

Scientists have discovered that liquid spray delivery is the preferred method for nutrients and medicines. In fact, spray nitroglycerin is now the standard delivery form for heart patients. Studies have shown that when taken orally, the drug is released at a controlled rate allowing for full absorption. Within seconds, the nitroglycerin is working on the heart to restore rhythm.

Spray technology is a patented delivery systems for vitamins, minerals, herbs, amino acids and other supplements. A 55-microliter spray delivers high concentrations of nutrients, without the excess fillers and binders found in outdated pill technologies.

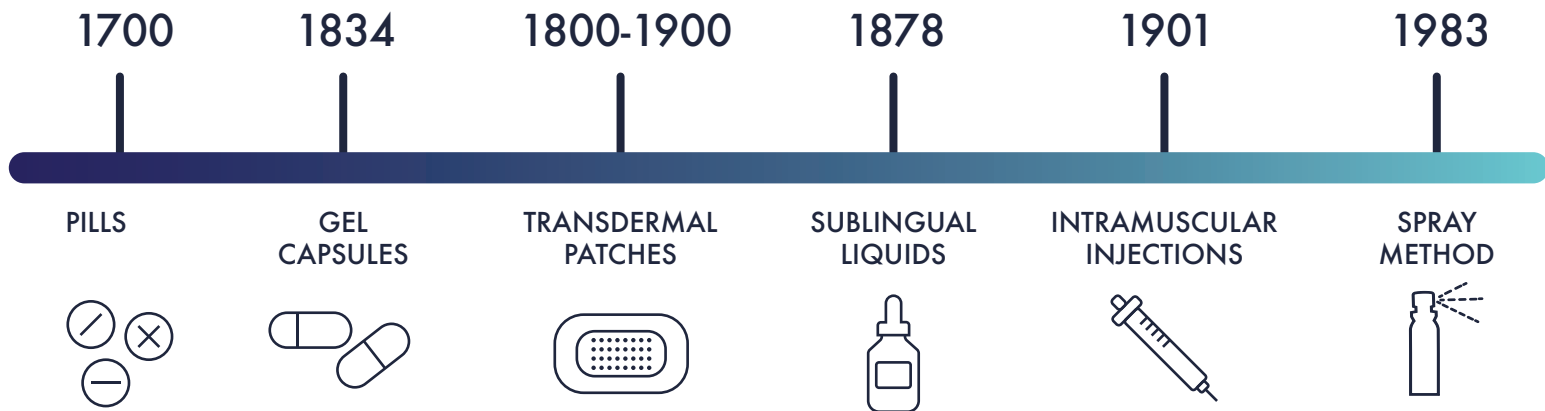

Through spray supplementation, nutrients are absorbed much more easily into the bloodstream, and then rapidly delivered into the cells that need them.

THE HISTORY OF SUPPLEMENTS

For years, the medical establishment has been addressing the problem of proper drug and nutrient absorption.

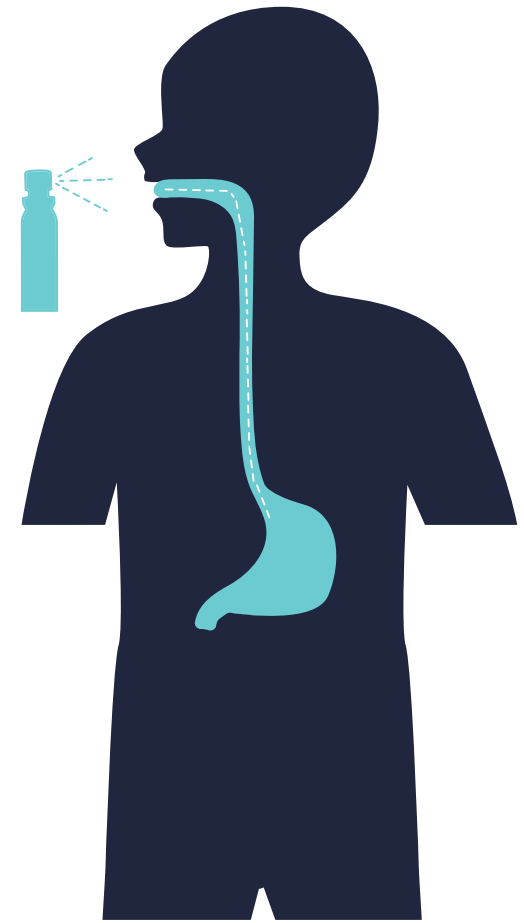

NONE OF THE PREVIOUS TECHNOLOGIES HAVE BEEN AS EFFECTIVE AS SPRAY VITAMINS.

THE BREAKTHROUGH

Once the micro-fine mist containing the drug or nutrient is sprayed into the mouth and swallowed, absorption is both rapid and efficient.

Spray technology works by bypassing much of the digestive process, greatly reducing the time it takes nutrients to reach the bloodstream, and maximizing the amount absorbed.

We've worked with leading doctors, scientists, and nutrition experts to create NVISIONU. We continue to work with them closely on our product development and to stay on top of the latest research findings.

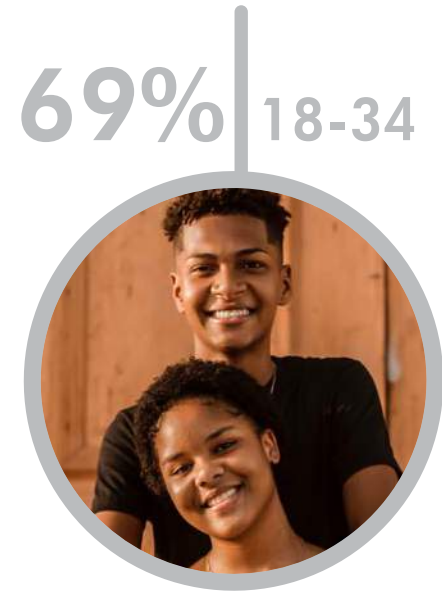

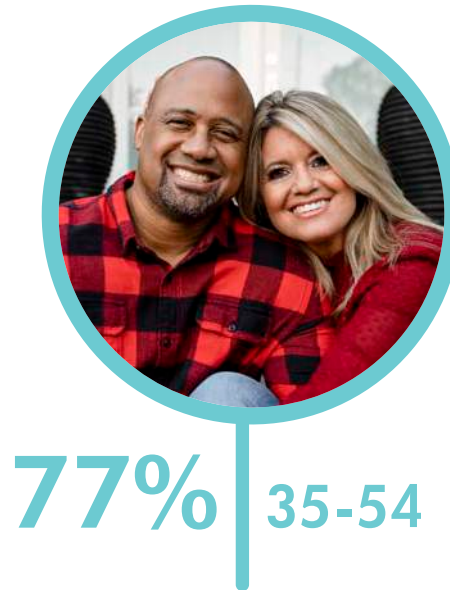

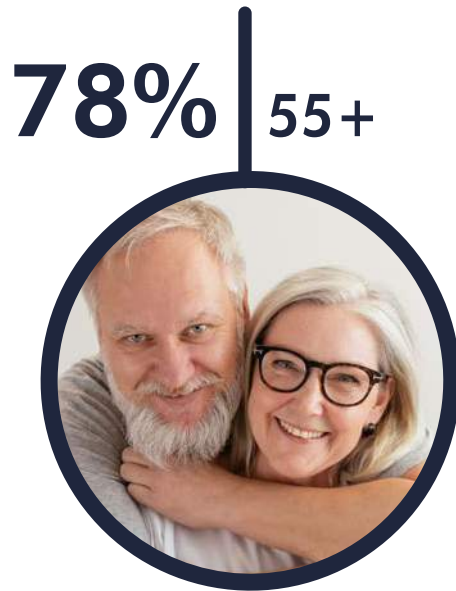

40% of Americans have difficulty swallowing pills and let's face it, no one really enjoys doing so. NVISIONU Supplements are doctor-formulated, convenient and taste great.

70% of Americans prefer taking sprays as an alternative to pills. The sprays contain no fillers or binders. They are sugar free, gluten free and suitable for diabetics. They are manufactured to the highest standard in FDA approved facilities in the USA.

PERCENTAGE OF U.S. ADULTS TAKING DIETARY SUPPLEMENTS IN EACH AGE GROUP:

THE PROBLEM: WHAT YOU CAN FIND IN YOUR PILLS MAY BE HURTING YOU

Pills are made
from things like:

- Wax
- Glue
- Yeast
- Shellac
- Sugar
- Wood Fiber
- Animal Fat
- Talcum Powder
- Others....

GUMMIES

- Particularly gummy multivitamins often do not contain their listed amounts of vitamins or minerals or contain impurities.
- Candy-like supplement encourages consumption potentially resulting in toxicity.
- Overload with vitamins and folic acid, when first produced and decreasing amounts throughout their shelf-lives.
- Aren't vegan

LIQUID DROPS

- Some liquid drops supplements may require refrigeration making it difficult to take with you during the day or when traveling.
- Some ingredients are less stable in a liquid environment, resulting in a loss of ingredient over time.

NO MORE PILLS...

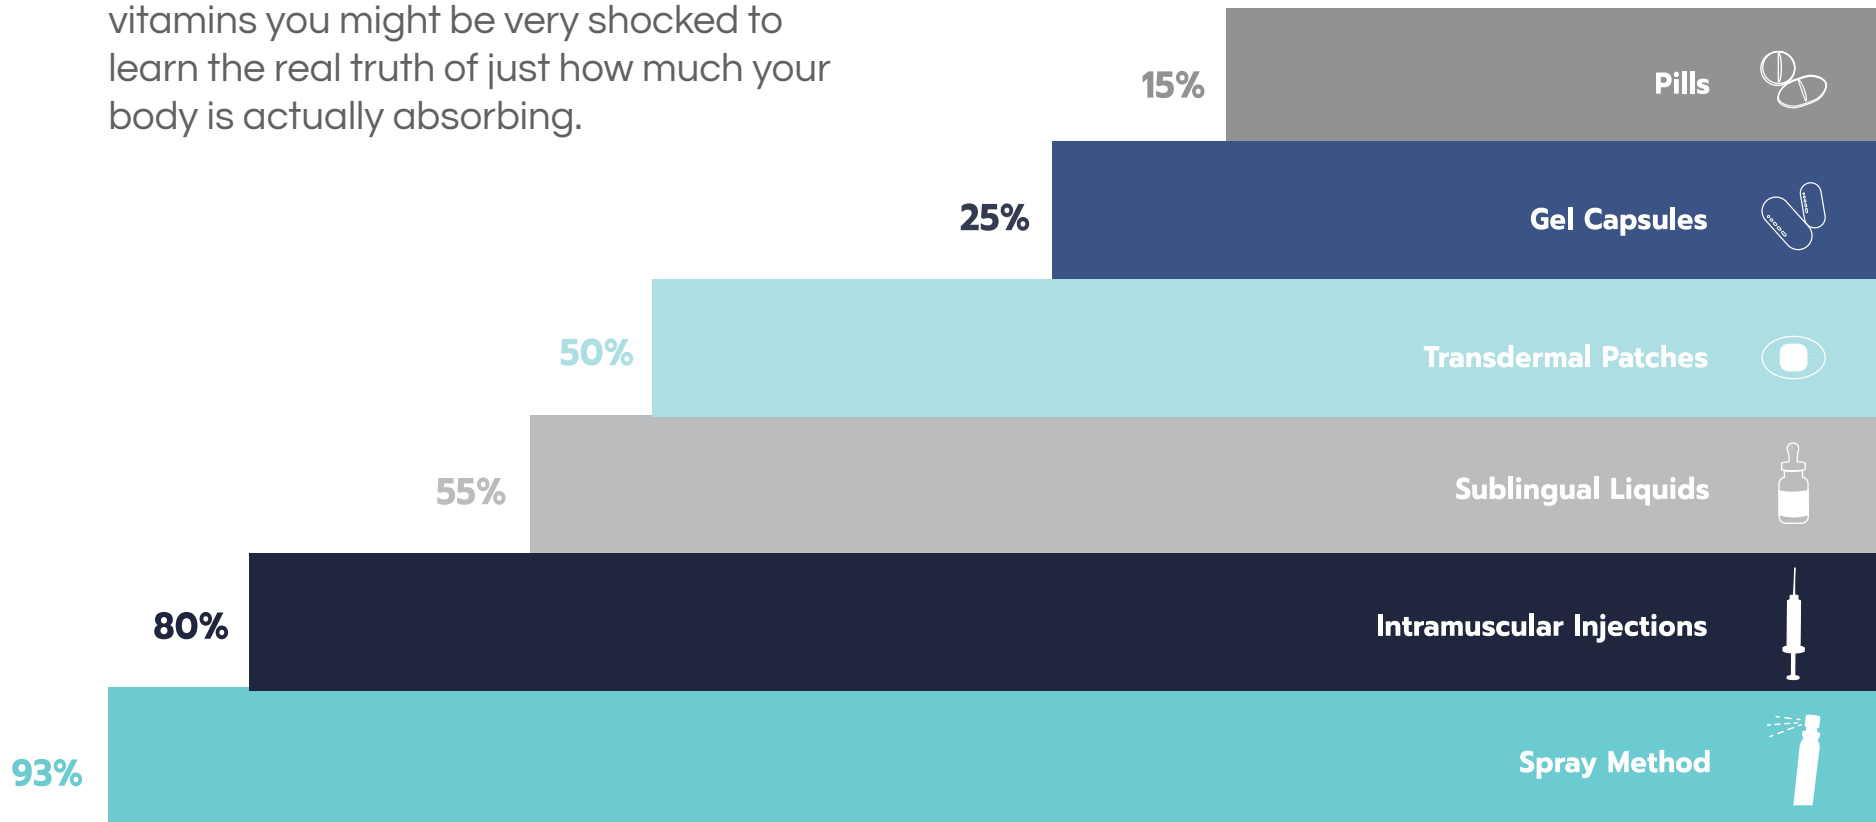

Makers of pills, tablets, or capsules have standard size molds. The manufacturer will add fillers, binders, waxes and other excipients to take up the space.

If a company claims it does not use any of these common fillers in manufacturing pills, then they surely use dehydrogenated animal fat. They have to use something to fill up the space within the mold. Also they must use wax or some kind of binder to make the components stick together when they squeeze everything to make the pill.

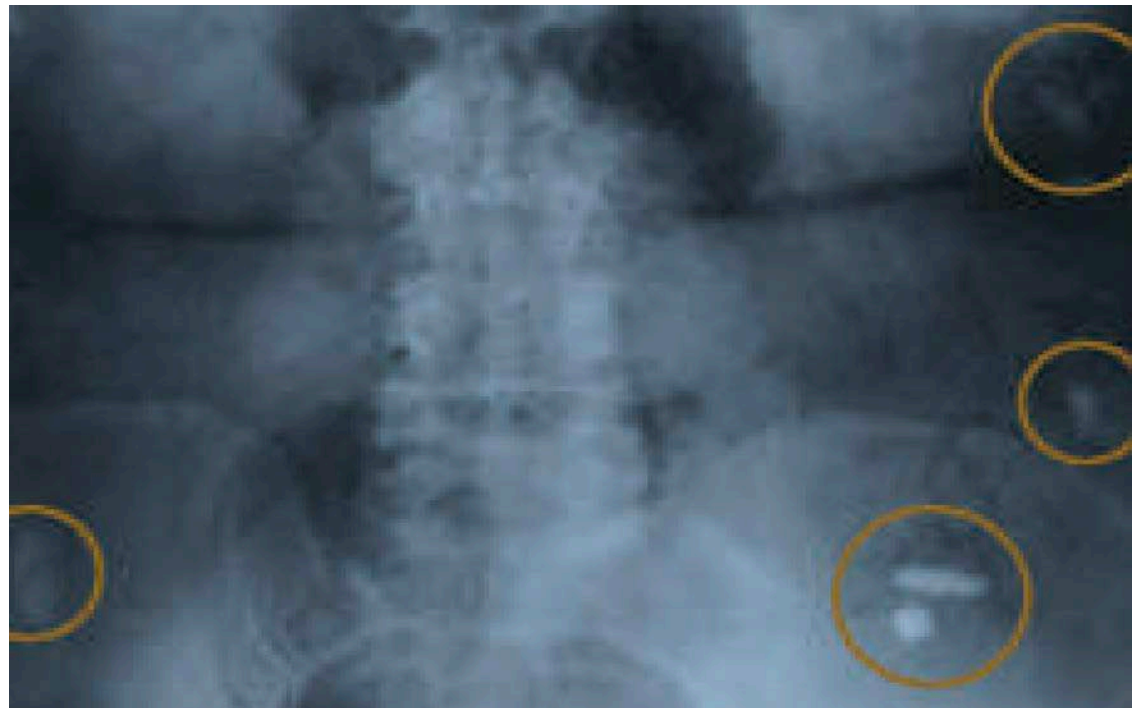

HOW EFFECTIVE ARE YOUR CURRENT PILLS?

When comparing the body absorption rates of the various methods of taking vitamins you might be very shocked to learn the real truth of just how much your body is actually absorbing.

OUR INGREDIENTS

Vitamin A

Vitamin A is a group of unsaturated nutritional organic compounds that includes retinol, retinal, retinoic acid, and several provitamin A carotenoids. Vitamin A has multiple functions: it is important for growth and development, for the maintenance of the immune system and good vision.

Vitamin B12

Vitamin B12's primary functions are in the formation of red blood cells and the maintenance of a healthy nervous system.

Vitamin B6

Vitamin B6 is involved in more bodily processes than any other vitamin or mineral. Government studies indicate, however, that one-third of all adults and half of all women are not getting enough of this key vitamin.

Selenium

Selenium is a component of the amino acids selenocysteine and selenomethionine. In humans, selenium is a trace element nutrient which functions as cofactor for reduction of antioxidant enzymes such as glutathione peroxidase and thioredoxin reductase. It also plays a role in the functioning of the thyroid gland by participating as a cofactor for thyroid hormone deiodinases.

Amino Acids

Amino acids are organic compounds that combine to form proteins. Amino acids and proteins are the building blocks of life. When proteins are digested or broken down, amino acids are left. The human body uses amino acids to make proteins to help the body.

Vitamin D

Vitamin D or D3 is a fat-soluble vitamin long known as essential for promoting calcium absorption and thereby ensuring healthy bones. Without sufficient calcium and vitamin D or D3, bones can become thin and brittle. Also known as the sunshine vitamin, Vitamin D is a fat-soluble vitamin that our bodies produce when we are exposed to sunlight. Insufficient exposure to natural sunlight can lead to lower levels of Vitamin D.

Vitamin C

One of the most well known vitamins, Vitamin C is also a powerful water-soluble antioxidant. It is important to have a good mix of both water and fat-soluble vitamins in your diet.

Vitamin E

Vitamin E is a fat-soluble nutrient found in many foods. In the body, it acts as an antioxidant, helping to protect cells from the damage caused by free radicals. Free radicals are compounds formed when our bodies convert the food we eat into energy.

ZINC

Zinc is found in cells throughout the body. It helps the immune system fight off invading bacteria and viruses. During pregnancy, infancy, and childhood, the body needs zinc to grow and develop properly. Zinc also helps a wound heal and is important for proper senses of taste and smell.

Magnesium

Magnesium is a nutrient that the body needs to stay healthy. Magnesium is important for many processes in the body, including regulating muscle and nerve function, blood sugar levels, and blood pressure and making protein, bone, and DNA.

Melatonin

Melatonin helps regulate the body's biological clock to create healthy patterns of sleep. When these patterns are disrupted, Melatonin can help “reset” the body's biological clock. Melatonin is especially beneficial for those suffering from jet-lag and other non physiological causes of sleep deprivation.

Valerian

Valerian is most commonly used for sleep disorders, especially the inability to sleep (insomnia). Valerian is also used orally for anxiety and psychological stress, but there is limited scientific research to support these uses.

Folic acid

A synthetic form of folic acid is used in dietary supplements and fortified foods. Folic acid acts by helping the body produce and maintain new cells. In particular, red blood cell formation is dependent upon adequate levels of this vitamin. Folic acid deficiency is a known cause of anemia in both adults and children.

Cayenne

Cayenne peppers may have many health benefits that are the result of their active component, capsaicin. They may reduce your appetite and help lower blood pressure, among many other benefits.

Caffeine

Caffeine acts as a central nervous system stimulant. When it reaches your brain, the most noticeable effect is alertness. You'll feel more awake and less tired, so it's a common ingredient in supplements to treat or manage drowsiness, headaches, and migraines.

Folate

Folate is a B-vitamin that is naturally present in many foods. Your body needs folate to make DNA and other genetic material. Your body also needs folate for your cells to divide. A form of folate, called folic acid, is used in fortified foods and most dietary supplements.

Thiamine

Vitamin B1, thiamin, or thiamine, enables the body to use carbohydrates as energy. It is essential for glucose metabolism, and it plays a key role in nerve, muscle, and heart function. Vitamin B1 is a water-soluble vitamin, as are all vitamins of the B complex

Chromium

Health benefits, sources, and potential risks. Chromium is an essential trace mineral that can improve insulin sensitivity and enhance protein, carbohydrate, and lipid metabolism. Chromium may enhance muscle mass, weight loss, and glucose control, but researchers are still working to confirm this.

Niacin

Niacin is one of the eight B vitamins, and it's also called vitamin B3. Nicotinic acid: As a supplement, nicotinic acid is a form of niacin used to reduce cholesterol levels and lower your risk of heart disease.

Biotin

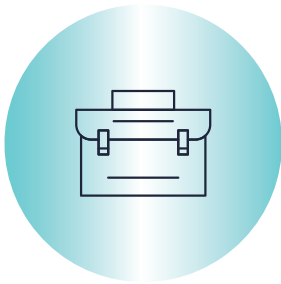

Biotin is a water-soluble B vitamin, also called vitamin B₇ and formerly known as vitamin H or coenzyme R. It is involved in a wide range of metabolic processes, both in humans and in other organisms, primarily related to the utilization of fats, carbohydrates, and amino acids.

The background is a deep space scene. It features a gradient from dark blue on the left to teal on the right. Numerous small white stars are scattered across the field. A prominent, bright, glowing nebula or comet tail is visible on the right side, curving downwards. The text 'THE FUTURE' is centered in a white, sans-serif font.

THE FUTURE

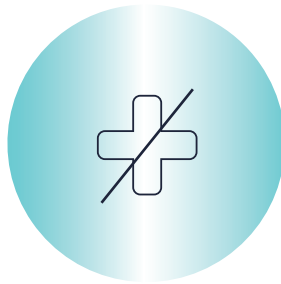

SPRAY SUPPLEMENT ADVANTAGES

When you travel, or during a busy day, you don't have to worry about carrying around a variety of pills.

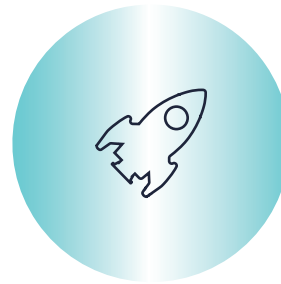

EASY TO USE ON THE GO

ADDITIVE FREE

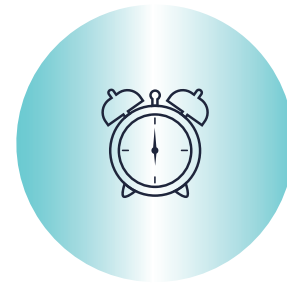

Spray supplementation offers a clean alternative to taking vitamins and supplements in pill form.

The nutrients are more readily available for absorption, giving your body what it needs, when it needs it.

ABSORBED WITHIN 30 SECONDS

CONVENIENCE

Cut down on the number of missed doses, and increase your health and levels of energy.

SPRAY SUPPLEMENTS VS. PILLS

1. Spray and swallow.
2. Nutrients are absorbed into the blood stream.
3. Nutrients start to work magic.
4. Nutrients transported to nutrients start working their magic.

1. Take with glass of water.
2. Pill descends to stomach.
3. Pill begins to break-up and release nutrients.
4. Nutrients, if assimilated, enter portal circulation.
5. Nutrients, if assimilated, enter portal circulation.
6. Small fraction of original nutrients enters circulation for transport to site of action.
7. Pill residue is excreted.

HOW IT WORKS

When sprayed into the mouth and swallowed, micro-sized beads or droplets are immediately absorbed into the capillaries that line the stomach and intestines. Pills and gummies are different. They need to break down through digestion first before your body can use them. Our sprays allow nutrients to be absorbed rapidly, without causing additional work or stress for your organs.

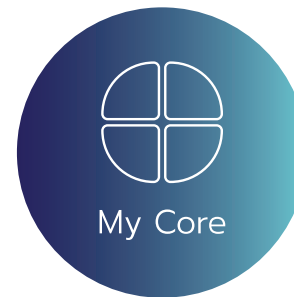

Each spray delivers tiny droplets into the soft tissue of the mouth.

These droplets are then absorbed, entering your blood stream.

This allows the formulation to quickly enter the bloodstream for optimal absorption.

55-microliter spray delivers high concentrations of nutrients, without the excess fillers and binders found in outdated pill technologies.

nVISIONU™ IN YOUR DAILY LIFE

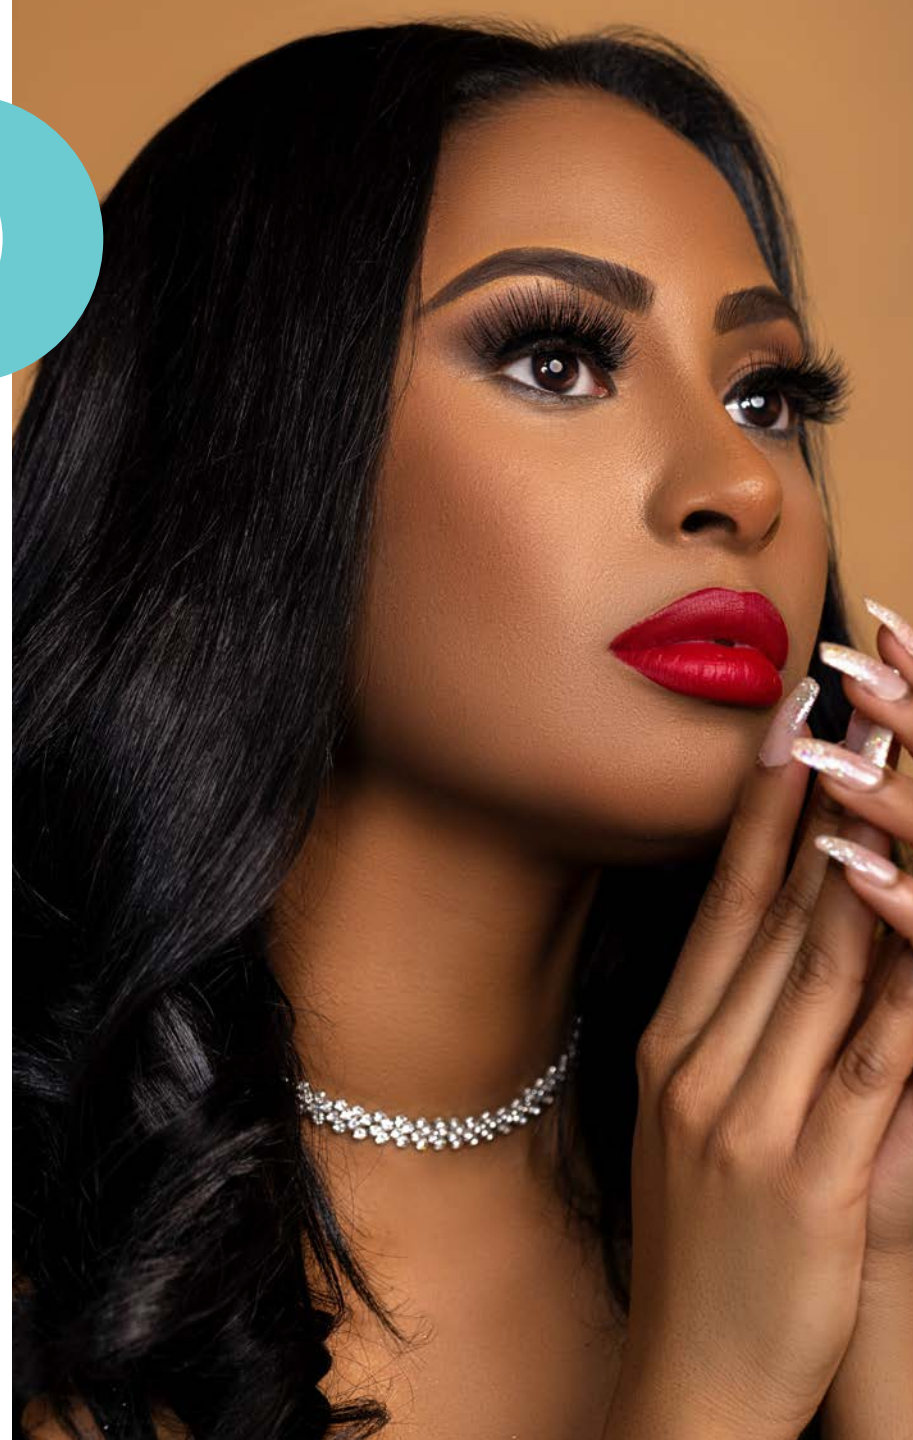

EVERYTHING YOUR BODY NEEDS IN 30 SECONDS

BEAUTY

Collagen is all the buzz today. It's got many of us drinking bone broth daily to get the best hair, skin and nails possible. But we've found the real key to glowing, radiant skin and luxurious hair starts with what you eat and ensuring you are getting the daily nutrients your body needs. When we eat beauty foods, vitamins, minerals and herbals we're truly amplifying beauty from the inside out.

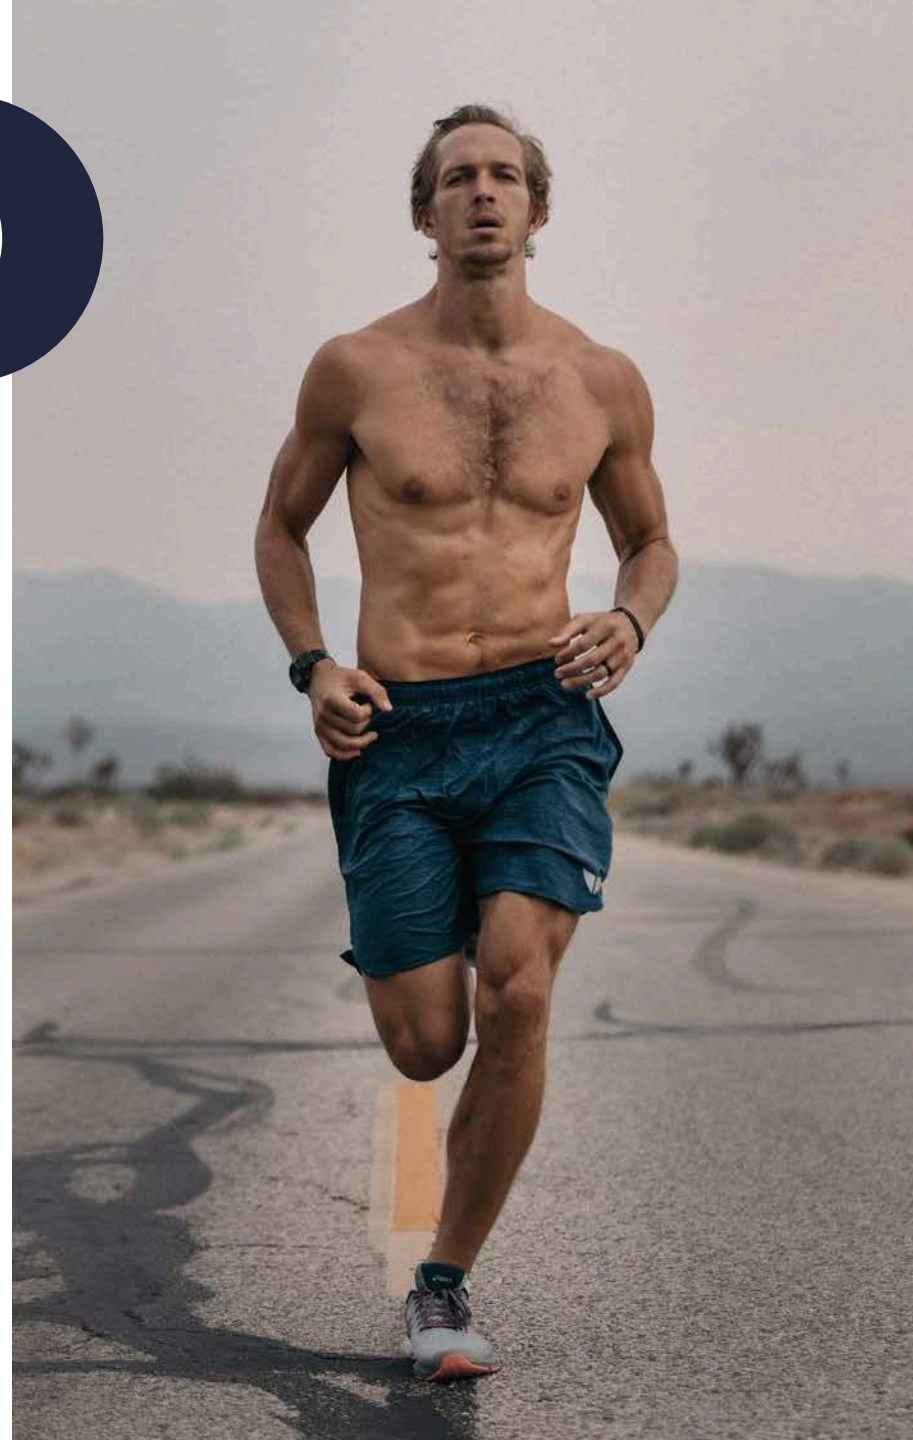

CORE

The body requires essential vitamins and minerals to function, but most of us don't perfectly meet the daily amounts of each recommended by the USDA.

Taking a multivitamin or specific vitamins and minerals is one way to help ensure that you are meeting those goals. Spray powered by vitamins, minerals and herbals better fill any gaps in your diet.

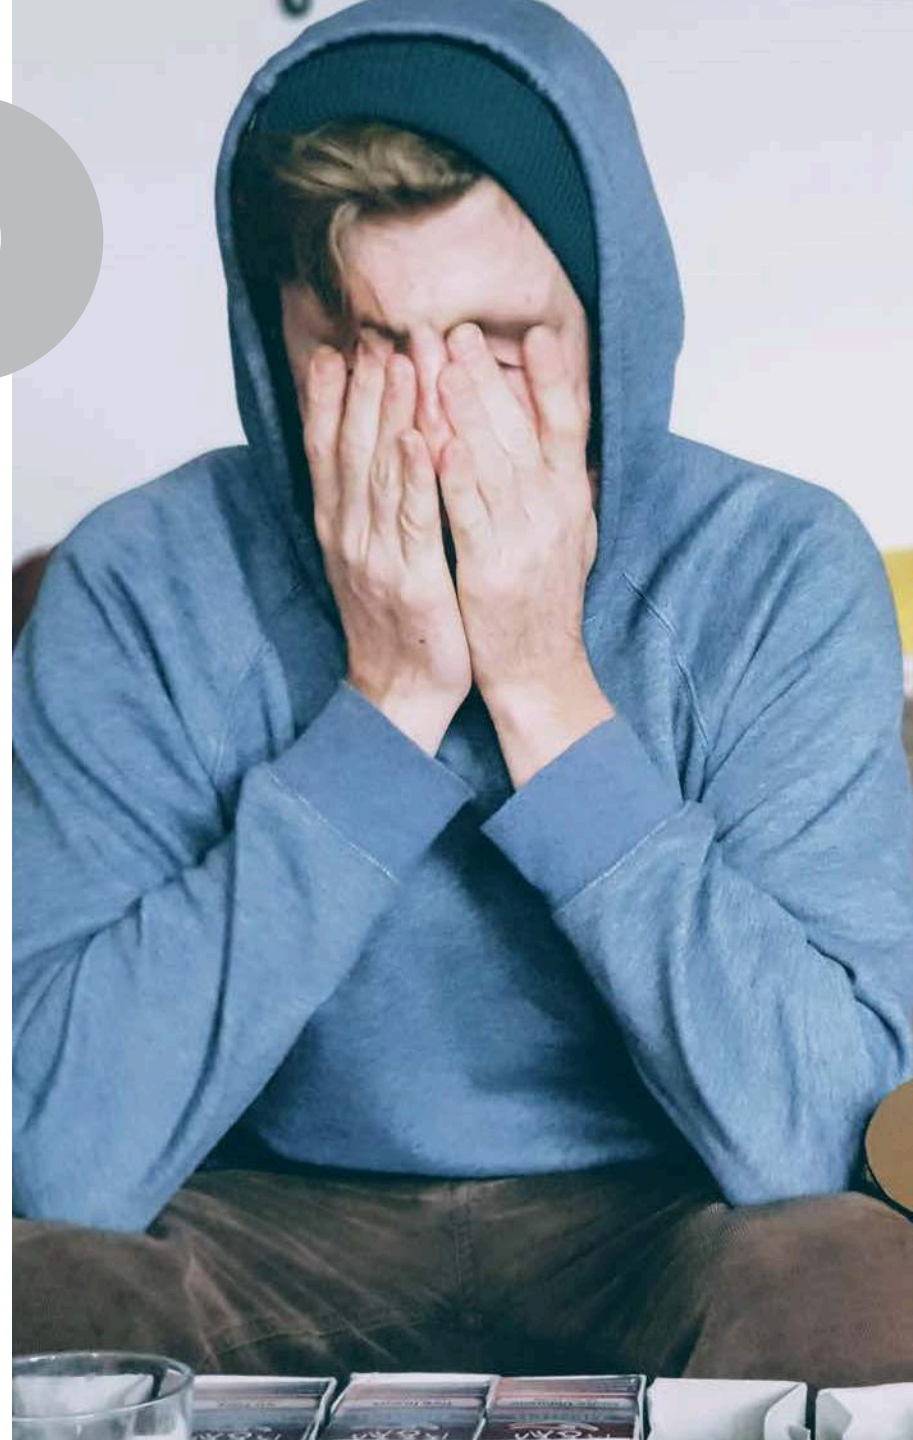

STRESS

Stress

Let's be real: Stress is a common factor in most people's lives. And it's not going away. But here's the deal. Too much stress can really put you at risk of developing a range of illnesses – from the common cold to severe heart disease.

Reducing stress in your everyday life is vital for maintaining your overall health. When you reduce stress in your body and mind, it can improve your mood, boost immune function, promote longevity and allow you to be more productive.

ENERGY

Do you feel that energy nosedive mid afternoon at work when you need to be most productive? Or are you seldom in the mood for sex with your partner? Have you just been feeling “blah” and like you need coffee to get through the day? You aren’t alone! So many of us struggle with a lack of energy and fatigue daily. To feel good and attack your day with vigor, you need steady, sustained energy.

We have several sprays powered with the best vitamins, minerals and herbs on the planet to give you the energy you need no matter what is causing your fatigue.

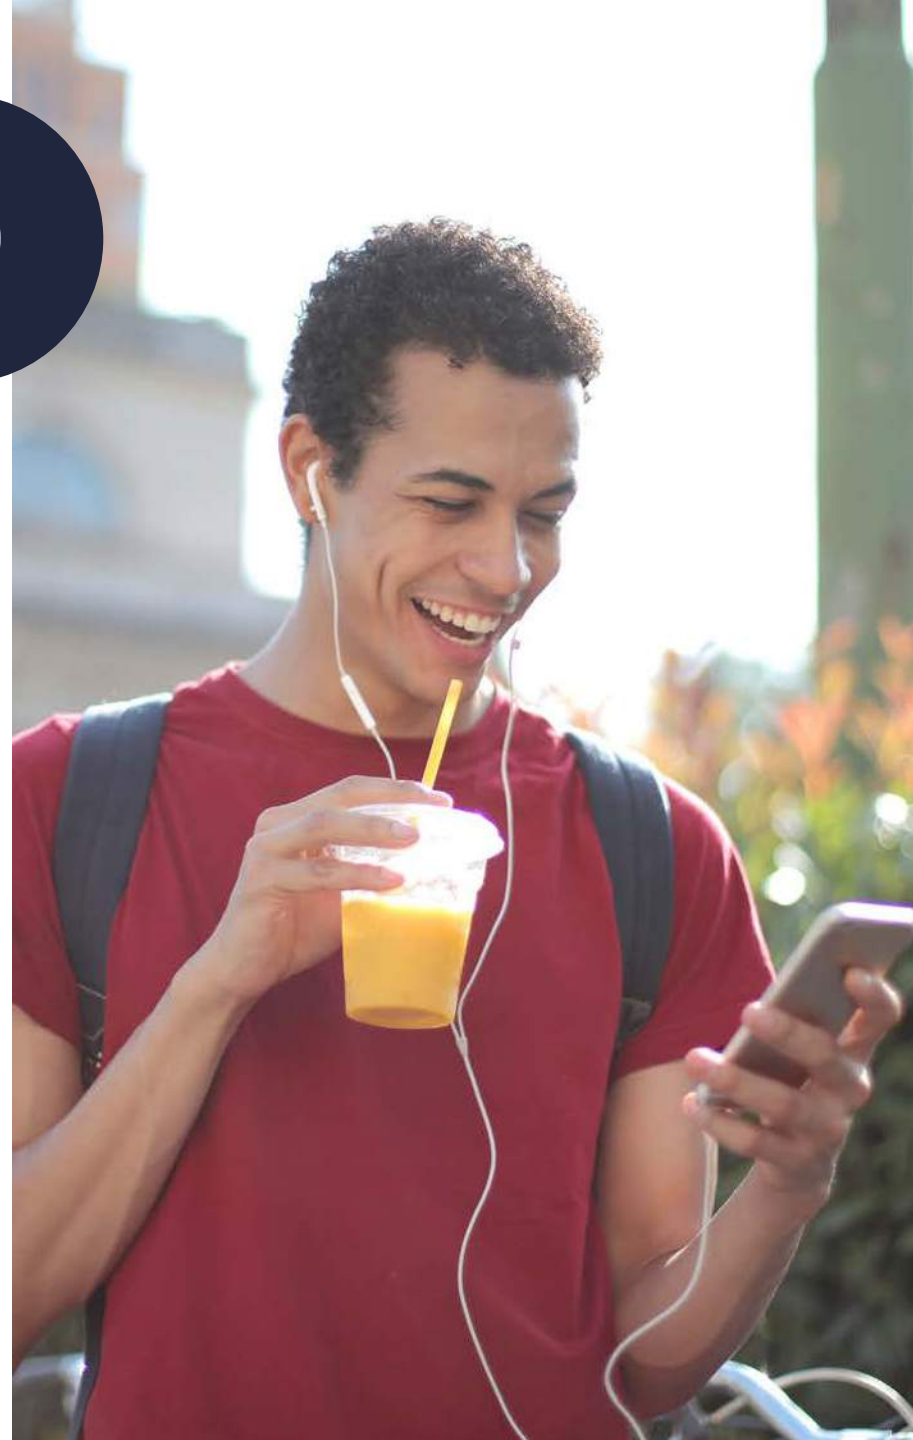

IMMUNITY

We are often asked, "How can I strengthen my immune system naturally?" In reality, it's about training and supporting our immune system so it can do its job correctly. Meaning: We want our body to fend off viruses, pathogenic bacteria, and parasites.

But there is also another thing to consider with our immune system. We also don't want it to work too well...We want to prevent autoimmune diseases, which is essentially when your immune system is overactive and starts attacking your body. The good news is there are vitamins, minerals and herbals that can boost our immune system, and help it work effectively.

LONGEVITY

Longevity

Want to live longer? To see your child walk down the aisle? Do you want to hold your grandchildren, or live long enough to make it to Mars? We all have different reasons for wanting to live a long healthy life. However, many of us are confused about what exactly we need to eat or what we need to do in order to reach our 80's, 90's or 100's. Now to be clear, we have no fountain of youth here, but at NVU we have found through research that certain minerals, vitamins and nutrients can support cellular function, which can help your body and mind with aging, age-dependent damage, and regeneration.

FITNESS

Movement is essential to our physical, mental, and emotional health. But even though we know exercise is important it can be tough to fit into our busy lives. We've found that when you feel good in your body you are more motivated to keep your fitness commitments to yourself.

Whether you are a marathon runner who needs extra energy for long runs, or a smoker who wants to quit so working out feels good again - we've got fast acting supplement sprays you can use on the go to help you create a fitness routine today, tomorrow and for all your days to come.

OUR PRODUCTS

DREAMING

WITH MELATONIN, VALERIAN ROOT & GABA

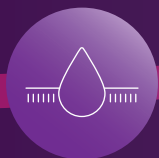

Do you have trouble falling asleep or getting a full night's rest? NVU Dreaming™ is a special blend of GVM (GABA, Valerian Root, and Melatonin) to help you get a natural, restful sleep without feeling groggy the next day. When used approximately 30 minutes before bedtime, this spray will reset your biological clock and support healthy long-term sleep patterns.

BENEFITS:

- 30 Second Melatonin Boost
- 100% Natural
- Produces Good Sleep Patterns
- Improves Restful Sleep
- Helps Fight Symptoms of Jet-Lag
- Gentle on Digestive System
- Reduces Symptoms of Anxiety
- Enhances Mood
